Subject: RE: Cibola Medical Review

Today's Update:

- The morning began with a request for credentialing information. We were given the spreadsheet listing items they were looking for, and compiled the available information (a few gaps noted) by mid-day.
- Today they are reviewing:
 - credentialing,
 - training,
 - chronic care records, and
 - have conducted a full review of the dental area and procedures.

We continue to receive very little feedback on the results of their review thus far, or the status of their review on the material we are providing. Hopefully tomorrow's closeout will provide substantive information.

John
